

# Essence

Comfortable and intuitive mobile desktop phone with 4G / VoLTE support, contact synchronisation and cloud administration

## Familiar and smart

Familiar shape of an office phone, intuitive use, synchronized contacts, first-class reliability and cloud administration. That makes Essence an ideal desktop mobile phone for almost any office. If you are looking for a proven landline replacement, you have found it.

## Comfortable and helpful

Eleven quick dial hotkeys, dedicated call transfer button, loudspeaker or silent mode make everyday use of Essence comfortable. Multicolour LED lights are used for intuitive notifications. Do you have a missed call from your boss? The blinking LED next to an assigned hotkey will let you know. Is silent mode or loudspeaker turned on? A dedicated key will light up. Essence keeps you in the picture.

## Always synchronized

Thanks to our cloud service Jablotool.com you can access your phone remotely from any web browser, comfortably manage your phone book and hotkeys, send a text message (SMS), read incoming messages, check missed calls or divert incoming calls to a colleague. If you use Google or Microsoft Exchange account, you can easily synchronize contacts with your Essence phone.

## Cloud administration

Jablotool.com provides also intuitive but effective administration of desktop phones in companies and institutions. Administrators have a complete overview of phone status, can create phone groups and shared corporate address books, assign users and define their rights, set up call forwarding rules, etc. All with just a few clicks.
